This is the conundrum that most physicalists have a blind spot on  
No physical mechanism or breaking science can explain how neural firings create mental  
or perceptual experience or awareness  
No explanation for insight intuition imagination creativity vision intention desire wonder  
curiosity or perceptual activity - that we call everyday reality  
The modeling ( which occurs in consciousness ) can get you only so far

Water, can be said to “ survive “ . Heat , it cool it , it returns to water. Many other combinations of hydrogen and water did not survive

We don't know why atoms exist. Or if they do. So perception is wayyyy down the line

Energy also a vague concept , can manifest itself in many forms. The charge on an electron. Attracts a positive . Is the electron aware? . open to change. If there are many , more combinations possible. I guess I could say that the molecule is the result of electron “ culture “.

Water and all physical objects including atoms are human words for changing perceptual and cognitive activities as is this conversation . They themselves activities of awareness in awareness

Awareness alone is !

I realize the the HUGE challenge in overcoming the superstition of matter ( it's a concept )

If we were freed from this superstition we could create new technologies and immersive realities and explore the universe without going anywhere

I'm going to yoga class soon

Energy is a concept like matter is

It's first an experience then a human interpretation of that experience

By reifying flashes of evanescent perceptual snapshots the notion of objective reality is created and gives us the capacity to quantify and measure - so matter / energy are useful constructs but constructs nevertheless

We create the universe

Everything you call the world is a sensation in the body

In turn ever sensation in the body and the body itself is a changing experience and

modification of awareness in awareness . There is nothing substantial about any of it

Only the invisible is real . "In this playhouse of infinite forms I caught sight of the infinite formless " - Ravindranath Tagore ( Indian Nobel laureate - had lots of arguments with Einstein )

Everybody here surprised - and happy about it. Nobody quite understand why he did it - including myself. Completely opposite to what I was told in the White House. What is he

up to? Spoke with new Syria UN envoy, Geir Pedersen, who used to work for me.  
Russians very good and kind.

Could be he doesn't want them there if a much bigger operation might put them in jeopardy . Reminder , he will take everyone down with him, if he feels the end is near. I always urge people not to corner a rat. . they become extremely dangerous and unpredictable
